

Application to Tool 2: Young Scientist Sponsorship

“Young scientist sponsorship” can be applied by PhD students, young clinicians and post docs for their own salary during their academic training on a CF-specific research field e. g. CF therapy, diagnostic or preclinical research. Therefore this funding will enable young scientists to deepen their knowledge in CF research and to place oneself within the network of CF scientists. In the long term, this should result in the establishment of an own CF research group. The application should be submitted by the young scientist by presenting a work outline for a CF-relevant project, training or study during the academic education. The planned project must be CF-relevant and the work plan has to be explained. Additionally, the application must include a letter of support of a mentor/senior scientist experienced in CF and who confirms the supervision throughout the whole funding period. In the case of applicants from hospitals, additionally there must be a confirmation of the direction about the release from clinical activities. A „Young scientist sponsorship“ is only available for applicants from groups located in Germany. The duration of funding may not exceed 3 years and depends on the education status (e. g. funding of a doctoral student will be possible up to three years, funding of a post doc will be possible up to two years). The costs for consumables and equipment must be provided by the working group of the applicant. Additionally, travel costs can be requested up to 1.000 € per year. Applicants should note that only applications using our form sheets and which are completed in full will be taken into consideration. Applications which do not meet the published deadlines or do not fulfil format requirements will be returned to the applicant without examination by experts. We recommend to read the [information sheet for applicants before submitting any application!](#) You can attach graphics and photographs to this application after completing the form.

Project-Title: *(guideline max. 140 characters)*

Acronym:

Date:

Version of the Application:

1. Applicant:

First name / Last name

Academic Degree

Date of Birth

Institution

Department

Street/House Number

Post Code

Town

Phone

Fax

E-Mail

2. Mentor/Supervisor

Mentor:

Leader of the Working Group:

3. Exclusion of Experts for Evaluation

4. Research Proposal:

Summary (*guideline 1600 characters*)

Background: *(guideline max. 2000 characters)*

Own preliminary Work: *(guideline max. 1600 characters)*

Objectives of planned Research Project: *(guideline max. 800 characters)*

Work Schedule: *(guideline: 2 fields; if field 1 is not enough, please also use field 2. Field 1 max. 2900 characters; field 2 max. 2900 characters)*

Work Schedule Field 2

5. Outlook: *(guideline max. 1600 characters)*

6. Period for which Application is submitted:

Overall Application Period (total):

month

Required Commencement Date for Funding:

date

7. Cost Estimate:

Salary

per Year

total

8. Third-Party Funding:

An application has also been submitted to additional bodies for financial support for this project.

Insofar as an application for financial support from a third-party body has been successfully granted or such funding appears likely or an additional application has been made for financial support for the the project or part of the same, this should be indicated here:

9. Short summary of the proposed Project in Lay Language:

(guideline max. 1500 characters)

City, Date

Attachment

Bibliography of the working group (publications of the applicant and supervisor during the last two years):

Curriculum vitae

Please focus on your academic training (not more than 2 pages!)

Graphics and photographs

Additional attachments (e. g. submitted publications or congress abstracts)

Download the application form from the website, fill it out, add your attachments and send it as one document via e-mail attachment to shafkemeyer@muko.info. For more information, please call: +49 (0)228 98 78 042.
